EDUCATION

CVR College of Engineering

2022 – 2026

Bachelor of Technology - CGPA - 9.5

Hyderabad, India

Narayana Junior College

2020 – 2022

MPC - Percentage - 98.4%

Hyderabad, India

ACHIEVEMENTS

Secured 1st place in the AI & ML Track at Sudhee CBIT Hackathon

01-03-2025

- Developed an AI-powered satellite image analysis and classification system to enhance geospatial insights for environmental monitoring, urban planning, and sustainability.

Secured 3rd place in the Solutions Challenge Hackathon

10-02-2025

- Designed an innovative solution leveraging technology to address poverty-related challenges through data-driven insights.

PROJECTS

GeoVision | Python, Django, SQLite, Google Gemini, Google Earth Engine

03 2025

- Developed an AI-driven satellite image analysis system leveraging Copernicus, Google Earth Engine, Sentinel Hub APIs for geospatial insights in environmental monitoring, urban planning, and resource management.
- Implemented CNN for satellite image classification for detection and analysis of deforestation trends, carbon emission hotspots, water resource depletion, rapid urban expansion to support data-driven decision-making.

NoPoverty | Python, Django, SQLite, Google Gemini, Vertex AI

02 2025

- Developed an AI-powered platform leveraging census and satellite data for poverty prediction and resource allocation. Key functionalities include AI-driven support suggestions, a donation system for money and food, and a volunteer signup portal.
- Integrated features such as an Aid Locator connecting individuals with NGOs and welfare schemes, a Tweet Page for awareness, a crisis support system for relief access, an AI chatbot for real-time assistance, and a Job Finder to help secure employment.

EduOrbit | MongoDB, Express, React, Node.js

11 2024 - 12 2024

- EduOrbit is a collaborative, personalized, and gamified learning platform that enhances student engagement and simplifies academic collaboration. It offers progress tracking, interactive group rooms, video conferencing, AI-driven study assistance, and an intelligent recommendation system.
- It enhances learning through real-time discussions, resource sharing and AI-powered quizzes.

TECHNICAL SKILLS

Languages: Java, C, Python, JavaScript, SQL.

Databases: Oracle SQL, MongoDB, Firebase (Realtime Database), SQLite.

Developer Tools: VS Code, Eclipse, Jupyter Notebook, Google Colab, Jenkins, Maven, GitHub, Git, Docker.

Technologies & Frameworks: Django, Flask, ReactJS, NodeJS, ExpressJS, JDBC, Servlets, JSP.

Key Concepts: Machine Learning, Data Analytics, Artificial Intelligence, Neural Networks, Deep Learning.

Coursework: Data Structures & Algorithms (DSA), Operating Systems, Computer Networking, DBMS, Machine Learning, Object-Oriented Programming (OOP), Web Technologies, Software Engineering & DevOps, Image Processing, Compiler Design, Cloud Computing.

CERTIFICATIONS

AICTE Eduskills Generative AI: Internship in Generative AI (model creation & implementation).

AICTE EduSkills Google AI&ML: Internship in AI/ML fundamentals (ML, data analysis, algorithms).

Oracle Academy: Database Programming, Database Design, & PL SQL.

Social Winter of Code(SWOC): Contributed to open-source projects.

AWS Academy Cloud Foundations: Skills in cloud computing & AWS services.

Oasis Infobyte Virtual Internship (Java Development Intern): Hands-on experience in Java development.

MongoDB Course: Hands-on experience with NoSQL databases, CRUD operations, indexing, aggregation.

Accenture Forage: Completed a hands-on Data Analytics & Visualization simulation.

freeCodeCamp & Hackerrank: Responsive Web Design & CSS.

E-box: Advanced Data Structures (Java, C), Database Management System(MySQL), Python, Web Development.

SOFT SKILLS

Problem Solving, Communication Skills, Critical Thinking, Teamwork, Creativity and Innovation
